Rd 2

Rd 3

FINAL

WINNER

Instructions:

- You are playing the role of a Community Advisory Group member. These groups give *Coliban Water* advice.
- You should imagine our region is entering an extended drought.
- What advice will you give *Coliban Water*? How should water be allocated? What areas should we choose to prioritise over others?
- Use the tournament bracket to decide by selecting one Water Use over another until you have your number one choice.
- Be ready to share your answers.

Remember:

- If you choose one Water Use over another, *it doesn't mean the loser gets nothing*. It is just that you think it is less important.

Key Vocabulary:

Water Use: a way that we use water.
Prioritise: this means you think it is more important.
Advice: give helpful information.
Allocated: choose where something should go.
